

Thales Bursary Student Shines

Community Chest and its partners believe Education forms the basis of all human development and is a key contributor to fulfilling human potential.

A five-year partnership with Thales South Africa to the annual value of R1,7 million enables Community Chest to empower learners in marginalized and vulnerable Cape Flats schools to advance Science, Technology, Engineering and Maths (STEM) education.

Bursaries between R20 000 and R100 000 are awarded to recipient schools Joe Slovo High, Khanyolwethu High, Malibu High, Forest Heights High, Kleinvlei High and Sizimisele High, in the Community Chest Thales Fast Tracking Pathways to Success Bursary Programme.

Part of the annual donation focuses specifically on science with Thales donating science kits to participating schools. The donations culminate in the annual Fast Tracking Pathways to Success Science Quest competition that takes place at the Cape Town Science Centre.

Thales and Community Chest view our contribution as an investment in the future of South Africa. An educated nation is a powerful nation.
